MEMORANDUM FOR: Colonel White

SUBJECT : Additional Information on Items Appearing in the Logistics Office Report dated 7 August 1953

1. Proprietary Projects:

25X1A

[redacted], along with certain other members of the Logistics Office, was assigned to work with the I&R Staff analyzing proprietary projects. This was to be a job of considerable duration but would require only part time.

25X1A

The Inspector General desired an over-all inspection of TSS and gave [redacted] the assignment. [redacted] impressed by [redacted], desired his assistance in connection with the assignment and requested his services from the Logistics Office. [redacted] was advised the work was not the business of the Logistics Office, but, in response to Mr. [redacted] further plea, he was advised he could have the services of Mr. [redacted] for this assignment, which is estimated to last about two weeks, but that during this assignment [redacted] was working for him and not as a member of the Logistics Office.

2. Area Study [redacted]

25X1A

25X1

The [redacted] of the Coordination and Requirements Staff is constantly making studies in connection with the major base program to determine port, transportation, and other facilities for both present and proposed sites, as well as sites not heretofore considered. The [redacted] study falls into this category and is only the gathering and consolidation of such data. As a matter of fact, this item should not have appeared in a report to the DD/A Office, as it was really information to Mr. Garrison of the activities of the Section.
